THE GOOD SAMARITAN!

WOOD or COAL

Ahead of all Competition! 5463 of them manufactured last year-more than double the number of any other first class stove in one year, in the United States.

THEY contain all the improvements which are in all the first class stoves, and the advantages and improve ments over other stoves are in part as follows: 1st. The arrangement for broiling on the front hearth, —an improvement overlooked in other first class stoves.

—an improvement overlooked in other first class stoves. It has also the same arrangement for broiling on top.

24. A thorough ventilation of the Oven.

36. Introducing but air-draught to the fire chamber, thereby increasing the draught of the Stove, quickening its operations, and enabling it to throw out more heat—a matter much and justly complained of in other Stoves.

4th. An important improvement in the application of the damper, which throws the heat around the oven.

5th. Much greater weight, consequently heavier plates, and more durable as well as headsoner castings.

6th. A draft damper at each end of the fire box, so that the fire is equalized, and one gridle will heat as smick

that the fire is equalized, and one gible will heat as quick as the other, also heating the oven in half the time.

7th. Fire back protected by scap-stone, so it cannot burn out.

3 In addition to the above improvements, it has all that is combined in other first class Stoves, viz — Hot water Reservoir, Warming Closet, Roaster in front, Baker on top, Doors lived with best Russia Iron, &c., &c. Further, this stove is warranted to do the work with as little full as any other stave in the market, and in a superior manner.

All who want a first, class Stove, should never buy until they call and see the Good Samanitan, as they have in every instance given satisfaction.
